

If Sinclair Broadcasting is allowed to move forward with the airing of a documentary that is inflammatory towards John Kerry's past, in such a partisan manner, it will do grave damage to what this country was built on. I can not think of such a clearer example of why this trend of media consolidation is so harmful to our nation.

At the very least, the FCC should revoke Sinclair's license. They are clearly using their license to determine an election, and also have the gall to designate the program as a "news" telecast.

Mr. Powell, you have displayed a notorious zeal for further deregulation of media, in your pursuit of a media being as privately consolidated as possible. But I am hoping that this will result to be too much even for YOU, and you'll support the will of the people in removing this corrupt cabal from the airwaves.

Sincerely,

Jeffrey K. Blanch
